Searching for Sequoyah

“No one person has ever created a writing system in 5000 years of human civilization, so it was an incredible feat not only for the Cherokee, but for humanity.”

“From his birth, which no one knows quite the date, to his death no one quite knows, so his entire life is shrouded in mystery.”

“People said he was crazy. People said he was doing something wrong. Yet here we are, 200 years later, still talking about him”
